The easiest way to look up a book is to call up your library catalog and type in the title of the book you are looking for. If the library has your title, it is likely that you can download the book for free, borrow the book, or view the book online. A title called Randomized Algorithms and Probability by D. V. Kyne looks interesting. It is not available in the library, but you can use the link above to order the book or to find out more information on it. While it is not a great book, it might be a good starting point. You can read more about why you might want to read it at While it is not in the library, I found it on another site, This is a good book if you are interested in learning how to use Reduce and Expand.
